

Astronomy space universe vocabulary list

Here is a list of words associated with space, earth and the universe, from a to z:

acceleration	flight	planets	thruster
aerodynamics	galaxy	Pluto	trajectory
alien	gravity	probe	transmissions
altitude	heat	radar	transport
analysis	Hemisphere	radiation	turbulence
anomaly	hydrogen	rays	ultraviolet rays
asteroid	ignition	research	universe
asteroid belt	impact	rings of saturn	unknown
astronomer	instruments	rocket	unknown flying
astronomy	intergalactic	rocket	object (UFO)
astrophysics	interplanetary	rotation	unstable
atmosphere	interstellar	sample	Uranus
aurora	journey	satellite	Venus
beyond	Jupiter	Saturn	Zero gravity
big bang	laboratory	scientist	
black hole	launch pad	shooting star	
centrifugal force	light	shuttle	
collision	light year	size	
combustion	lunar lander	sky	
comet	magnetic	Solar System	
communication	Mars	space	
cosmic ray	Martian	Space	
crater	Mercury	space shuttle	
crew	meteorite	space station	
dangerous	milky way	space suit	
data	mission	spaceship	
density	module	speed of light	
descent	Moon	star	
disaster	mothership	stars	
discovery	motor, engine	stellar	
distant	navigation	stratosphere	
dust	Neptune	sun	
Earth	nitrogen	sun	
eclipse	objective	technology	
engineer	observatory	telescope	
equipment	orbit	telescope	
evidence	origin	temperature	
expedition	oxygen	The astronaut	
exploration	particles	The comet	
explosion	physicist	the constellation	
extraterrestrial	planet	the cosmos
